SUMMARY

Full Stack Developer with 3 years of experience building scalable web applications using modern frontend and back-end technologies. Expertise in Node.js, React, Angular, and microservices architecture, with a strong focus on performance optimization, secure APIs, and seamless third-party integrations. Proven ability to deliver high-quality solutions in agile environments.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, NestJS

Databases: MySQL, PostgreSQL, MongoDB

Tools & DevOps: Git, GitHub, Postman, Swagger, Vercel, Netlify, Jenkins, Kubernetes (K8s)

PROFESSIONAL EXPERIENCE

Solution Analyst Pvt. Ltd.

Full Stack Developer

08/2025 – 06/2026

- Collaborated on a car-based microservices platform, scaling architecture across 6+ panels (Admin, Dealer, Sub-dealer, Mobile)
- Constructed Angular and Node.js applications, reducing response time and improving system performance
- Optimized MySQL/PostgreSQL queries, improving data retrieval efficiency by ~25%
- Delivered multi-brand solutions (Hyundai, Ford), supporting multi-tenant showroom operations
- Built back-end systems for an Asian banking platform, enabling secure multi-country transactions
- Integrated multiple payment gateways, ensuring seamless and reliable cross-border payments
- Developed Admin and Merchant modules for transaction processing, monitoring, and reporting
- Boosted payment success rates by 15% across 500k+ daily transactions by refining back-end microservices and resolving critical bugs in Kubernetes

Ubitech Solutions Pvt. Ltd.

Full Stack Developer

09/2023 – 07/2025

- Built Angular and Node.js applications, reducing API response time by ~30% for 10K+ users
- Introduced face recognition and geofencing, improving attendance accuracy significantly
- Architected secure back-end systems with Redis authentication, rate limiting, and webhook integration
- Accelerated database performance by 20%+ through indexing and query tuning
- Integrated REST and SOAP APIs for third-party services and payment systems

PROJECTS

Full-Stack Expense Tracker [Live Demo](#)

- Full-stack Expense Tracker with JWT authentication, allowing users to securely register, log in, and manage their personal expenses
- Expense management with add, edit, delete, filter by category/date, sort by amount/date, and paginated list (10 per page)
- Analytics with summary cards (total this month, this year, top category) and dynamic Pie & Bar charts using Recharts
- Built with React.js (Vite) + Axios on the frontend and Node.js + Express + MongoDB Atlas on the backend, fully deployed on Vercel

MindPrep – Student Wellness Companion [Live Demo](#)

- Engineered a responsive student wellness web app using vanilla JavaScript, HTML, and CSS with AI-assisted development tools (vibe coding), covering mood tracking, guided journaling, and breathing exercises across a 5-tab single-page interface
- Implemented an interactive breathing engine using JavaScript timers (setInterval) to drive 3 guided techniques (4-7-8, Box Breathing, 4-4-6) through animated phase transitions
- Designed a mood tracking system featuring a 1–10 scale, 14 stress-trigger tags, daily reflections, and rule-based personalized wellness recommendations, with all data persisted via localStorage
- Built an Insights dashboard rendering a custom 14-day mood trend chart with hand-coded SVG, plus average mood scores and top stress-trigger analytics

EDUCATION

B.Tech in Electrical Engineering

Vikrant Institute of Technology and Management, Gwalior

2016 – 2020
